Application No. 009/465,006

Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: The amended claim (claim 11) by combining the properties of LC mediun raise new issues that would require further consideration and search.

Continuation of 5. does NOT place the application in condition for allowance because: The newly amended claim (claim 11) does not have support in the specification because the present invention does not teach an advantage of selecting the properties of dielectric anistropy of 3.2 or more and the ratio of 1.93 or less. The reference mixtures (kondo) have dielectric anisotropy and ratio (parallel/perpendicular) within the present invention (see examples 1, 3, 4 and 12).
